

WCA & SPECIALTY FLUSH KITS

FREEDOM, LIBERTY & HIGHRISE

HAND FLUSH RECIRCULATING

The Western Recirculating flushing system offers a quick and easy upgrade for Satellite's wheelchair-accessible restrooms. This advanced system features a recirculating filter that prevents waste from being pumped back through the bowl, ensuring it remains fresh and clean after each use. Additionally, the Western Hand Flush pump system is compatible with both 35-gallon and 68-gallon waste tanks, providing flexibility and convenience.

HAND FLUSH FRESH FLUSH

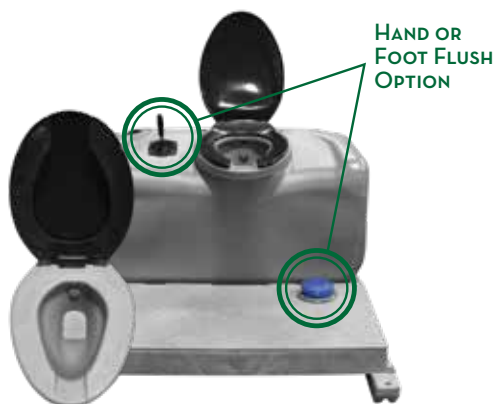

If you want to make your Liberty restroom more family-friendly, the Western Fresh Flush is the perfect upgrade. The Western Hand Flush pump system easily connects to the freshwater tank on the Pro-22 handwash sink, providing your customers with a full day of service for both handwashing and flushing.

HIGHRISE FLUSH KIT

The Highrise Recirculating Hand Flush is available in both Western and Flapper bowl options. Its innovative recirculating filter system ensures that waste is never pumped back through the bowl, keeping it pristine and fresh after each use.

STANDARD FLUSH KITS

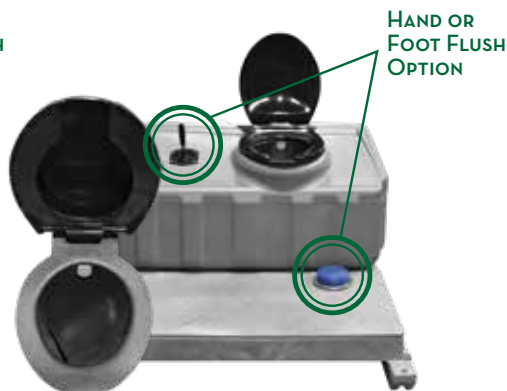

GLOBAL, AXXIS, TUFWAY, MAXIM 3000 & ASPEN

FLAPPER BOWL

This innovative flush system features a plastic flapper bowl that conceals waste and seals tightly to minimize odors. You can easily retrofit any of Satellite's standard units, as well as some specialty units, into a flushing unit with this versatile flapper bowl. It can be installed as a fresh flush when paired with the Pro-22 sink or as a recirculating flush system if no sink is present. The flapper bowl flush system is available with either a hand or foot pump option, offering flexibility to suit your needs.

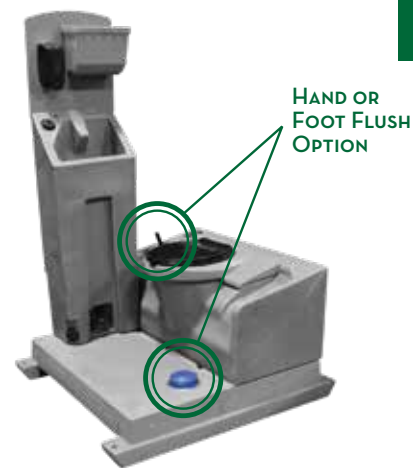

**Flapper bowl does not fit Axxis or Aspen portable restrooms. Foot Flush option is not available on Liberty or Freedom portable restrooms.*

WESTERN BOWL

The Western recirculating flushing system is a customer favorite due to its quick and easy installation, allowing you to upgrade any of Satellite's standard, wheelchair accessible, and many other portable restrooms into a flushing unit. Its recirculating filter system ensures that waste is never pumped back through the bowl, keeping it fresh and clean after each use. The Western Bowl Flush system is available with either a hand or foot pump option, providing flexibility to suit your needs.

**Foot Flush option is not available on Liberty or Freedom portable restrooms.*

FLIP TOP TANK

Satellite's Flip Top tank features a powerful nozzle flushing system, operated by a low-maintenance hand pump installed on the waste tank deck or a foot pump integrated into the plastic roto-molded skid. By using fresh water from the Pro-22 sink to flush waste, this system ensures that each user enjoys an at-home experience in a portable restroom.

**This tank only fits Satellite's Axxis and Vantage roto-molded base portable restrooms.*
