

14' | 3-DOOR, 3-STATION

Most three-station trailers are 12 feet long, but this trailer is two feet longer, and the benefit is clearly felt and seen when using the separate stations. Another advantage, which is true for all Satellite Suites trailers, is that all doorways are positioned on the same side of the trailer. This design makes positioning the trailer a simple process and ensures users will take full advantage of each station. In terms of durability, Satellite Suites trailers are constructed with non-wood materials to prevent costly water damage to the interior structure and to avoid the accumulation of mold and mildew, which can occur in wood frame structures.
